

Acme Corp — IT Security Guide

Password Policy: Passwords must be at least 14 characters and include upper- and lower-case letters, numbers, and symbols. Passwords expire every 90 days and cannot be reused within 12 cycles.

Phishing: Employees must report suspicious emails to security@acme.example using the 'Report Phishing' button. Never click links or open attachments from unknown senders.

Data Classification: Data is classified as Public, Internal, Confidential, or Restricted. Restricted data (e.g., customer PII) must never be stored on personal devices or unapproved cloud services.

Incident Response: Suspected security incidents must be reported within one hour. The incident response team follows a four-phase process: identify, contain, eradicate, and recover.

VPN: Remote access to internal systems requires the corporate VPN with multi-factor authentication. Split tunneling is disabled to ensure all traffic is inspected.
